

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1. (currently amended) A method for suppressing the number of peripheral blood lymphocytes comprising administering to a human in need thereof a pharmaceutically effective amount of a compound having a formula (I) [[:]]

wherein ~~R¹ represents a methyl group or an ethyl group, R² represents a methyl group or an ethyl group, and R³ represents a phenyl group substituted with 1 to 3 substituents selected from the group consisting of a halogen atom, a lower alkyl group, a cycloalkyl group, a lower alkoxy group, a halogeno lower alkyl group, a lower aliphatic acyl group and a cyano group, a pharmacologically acceptable salt thereof or a pharmacologically acceptable ester thereof which is (2R)-2-amino-2-methyl-4-{1-methyl-5-[4-(4-methylphenyl)butanoyl]pyrrol-2-yl}butan-1-ol or a pharmacologically acceptable salt thereof.~~

Claims 2 to 7. (canceled)

Claim 8. (withdrawn-currently amended) The method according to claim 1, wherein the pharmacologically acceptable salt is administered and the pharmacologically acceptable salt is a fumarate salt.

Claims 9 to 17. (canceled)

Claim 18. (currently amended) The method according to claim 1, wherein the compound is orally administered to a human adult at a dose of 0.0001 mg/kg[[/day]] to 1 mg/kg[[/day]].

Claims 19 to 32. (canceled)

Claim 33. (withdrawn-currently amended) The method according to claim [[32]] 8, wherein the fumarate salt is orally administered to a human adult at a dose of 0.0001 mg/kg[[/day]] to 1 mg/kg[[/day]].

Claims 34 to 42. (canceled)

Claim 43. (new) The method according to claim 1, wherein the pharmacologically acceptable salt is administered and the pharmacologically acceptable salt is (2R)-2-amino-2-methyl-4-{1-methyl-5-[4-(4-methylphenyl)butanoyl]pyrrol-2-yl}butan-1-ol hydrochloride.

Claim 44. (new) The method according to claim 43, wherein the hydrochloride salt is orally administered to a human adult at a dose of 0.0001 mg/kg to 1 mg/kg.
